

The Fibrefrog

Shorter than its big brother, The Fibrefish, this board is made of five plies of maple and four plies of fibreglass. This construction gives the Fibrefrog a cambered riding surface that, combined with a carefully selected flex and a shorter wheelbase, makes this model the most playful in our quiver!

Size: 34" x 8"
(86 cm x 20,5 cm)

Wheelbase: 24" (61 cm)

Shape: High camber, Minimal concave. Kicktail.

Construction: 5 ply Canadian hardmaple + 4 ply fibreglass

Flex: 2

The Concave Pin

The Concave Pin is a classic cruising longskate for everyone and is constructed from seven plies of Canadian hardmaple. Slightly softer than the Supercrusher, the Concave Pin is aimed towards riders who prefer a board that comes alive under their feet.

Size: 45,5" x 9,5"
(115,5 cm x 24 cm)

Wheelbase: 34,5" (87,5 cm)

Shape: Medium concave. Pintail.

Construction: 7 ply Canadian hardmaple

Flex: 4

The Lowrider

This maple/fibreglass board provides lots of foot space and a deep concave for good grip and comfy long hill bombs. For maximum stability, it has a dropped platform, which gives you a lowered centre of gravity and more stable and comfortable pushing/foot braking.

Size: 41" x 10"
(104.5 cm x 25.5 cm)

Wheelbase: 32.5" (82.5 cm)

Shape: Medium Concave, Dropped platform.

Construction: 7 ply Canadian hardmaple + 2 ply fibreglass

Flex: 3

The Supercrusher

The Supercrusher is a great cruising longskate for the advanced rider as well as the beginner. The board is constructed from seven plies of Canadian hardmaple, and has a carefully selected size and flex to give you a "surfy" carving feeling, but still a superb stability at higher speeds.

Size: 45,5" x 9,5"
(115,5 cm x 24 cm)

Wheelbase: 34" (86 cm)

Shape: Medium camber, Medium concave. Kicktail.

Construction: 7 ply Canadian hardmaple.

Flex: 2

The Fibrefish II

The Slipstream Fibrefish is constructed by five plies of maple and two plies of fibreglass. This construction gives the Fibrefish a cambered riding surface providing a perfect flex that gives you a fluid motion and deep carves. If you want optimal board control, this is the board for you!

Size: 38" x 8,5"
(96,5 cm x 21,5 cm)

Wheelbase: 27,5" (70 cm)

Shape: High camber, Medium concave, kicktail

Construction: 5-ply Canadian hardmaple + 2 ply fibreglass

Flex: 3

The Fibrefish III

The Slipstream Fibrefish 3 is the stiffer alternative to the regular Fibrefish model. Preferred by riders that might be heavier, have a more aggressive riding style, or just simply like the harder flex this board provides.

Size: 38" x 8,5"
(96,5 cm x 21,5 cm)

Wheelbase: 27,5" (70 cm)

Shape: High camber, Medium concave, kicktail

Construction: 5-ply Canadian hardmaple + 2 ply fibreglass

Flex: 2

The Pinstripe

Shorter but stiffer than The Concave Pin, this model also features a cambered shape for a more responsive feel. Great for both carving and cruising, this board, made of seven plies of Canadian hardmaple, performs really well, no matter what you throw at it!

Size: 37" x 8,5"
(94 cm x 21,5 cm)

Wheelbase: 29,5" (75 cm)

Shape: Medium camber, Medium concave. Pintail.

Construction: 7 ply Canadian hardmaple.

Flex: 3
